

Andrew, you have to insert the type of oil that the bags are treated with in claim 3, I left a blank for you to fill in.

Brother's-Bait-Bag

APPLICATION # 60/438,437

Claims

1. In a fishing lure comprising a fishhook with a pointed end, a bag having sidewalls formed of open-mesh material closed at one end and open at the other end and having means for drawing the open end closed thereby enclosing the fishhook within the bag, and a leader attached to the fishhook and extending through a sidewall of the bag, such that the bag is slideably mounted solely on the leader, whereby bait may be placed on the fishhook in the bag or in the bag without being placed on the fishhook and the bag then closed by said means, the bait being readily visually and/or olfactorily attractive to fish by reason of the open-mesh characteristic of the bag, and the pointed end of the fishhook readily penetrating the bag by reason of its open-mesh characteristics for hooking a fish, the improvement comprising wherein the bag is made of a nylon mesh material, is designed to catch a specific class of fish, and is open only at one end, whereby the bait may be placed on the fishhook in the bag, and the bag being closed at the top with a draw-string and slideably mounted on the leader.

2. The fishing lure of claim 1, further comprising wherein the open-mesh bag is soaked in a desired oil to enhance the olfactory attractiveness to a specific class of fish.

3. The fishing lure of claim 2, wherein the specific fish is fresh water trout, and

wherein said oil is crab or fish

not Blackish / salt

4. The fishing lure of claim 2, wherein said bait placed in the open-mesh bag is bacterium free soft-crab, and wherein the bait is not attached to the fishhook.

5. A method for catching a particular class of fish, wherein said comprises utilizing the fishing lure of claim 1, wherein the method comprises:

- (a) pre-soaking the open-mesh bag in a desired oil to enhance the olfactory attractiveness to a specific class of fish;
- (b) removing excess oil from the pre-soaked bag by blotting on absorbent paper;
- (c) placing bacterium free soft crab into bag;
- (d) affixing the bag onto the hook such that only the open end of the bag is slideably mounted onto the leader extending through the side walls of the bag.
